

PRESS RELEASE

26th February 2010

TIMBER PARTNERSHIP SETS THE WOOD APART FROM THE TREES

Lomond Timber Frame hopes to conquer the bespoke housing market after forming a lucrative partnership with specialist oak firm Carpenter Oak & Woodland.

Lomond is one of Scotland's foremost timber frame manufacturers while Carpenter Oak & Woodland specialises in the provision of high quality green oak portal frames and beams.

The alliance will allow both parties to offer a broader range of options to their customers by sharing their expertise and combining their services.

Stuart Rennie, managing director, Lomond Timber Frame, explained: "We often receive enquiries for timber frame kits with an element of oak post and beam features included, while Carpenter Oak & Woodland get lots of enquiries where the timber frame forms part of the building envelope.

"By joining forces we now have a solution to these requirements and can offer a 'one-stop shop' for customers and architects alike."

Andy Parker, commercial director of Carpenter Oak & Woodland, was equally excited about the mutually-beneficial partnership. He said: "In making building components work together the shrinkage and movement of green oak presents new and different challenges. There is now no need for specifiers to concern themselves with the interface between the structural oak and the envelope.

"This alliance allows us to offer a fabulous green oak frame complete with building envelope with all the interfaces expertly resolved by our two technical teams.

"There is symmetry between our respective companies and I believe, through this joint offering, our businesses can really grow and complement one another and our clients."

About Lomond Group

The Lomond Group is a family owned business and has acquired a land bank with the ability to generate an estimated turnover of £450 million over the next 10 years. Its divisions include:

[Lomond Homes](#) is a residential new homes builder with extensive timber kit construction facilities and a comprehensive design and build capability including site infrastructure design facilities.

[Lomond Land](#) is a vigorous land development operation increasingly proactive in identifying and assembling land development opportunities. In order to add land value to these opportunities the division has built up a strong and diverse in-house team of technical expertise.

[Lomond Timber Frame Ltd](#) can supply timber frame kits for any projects throughout the length and breadth of the UK, and prides itself on the supply of large bespoke houses for the individual homes market. Its commercial division can also supply kits for larger projects such as nursing homes, doctors' surgeries, hotels, flats and apartments.

[Lomond Properties](#) is an expanding property portfolio business that develops, owns, rents and services commercial property.

About Carpenter Oak & Woodland

Carpenter Oak & Woodland is the UK's leading provider of bespoke timber frames. With a twenty-year+ pedigree, Carpenter Oak & Woodland has developed an enviable reputation for the construction of high-quality timber-frame buildings, ranging from homes to commercial buildings.

Every structure which Carpenter Oak & Woodland produces is bespoke – in contrast to many timber frame companies which work with 'off-the-shelf' designs. We also work using traditional, time-proven methods, delivering completed projects full of unique character.

Carpenter Oak & Woodland's timber frames embrace both the best of traditional timber frame design and some of the most innovative uses of a timber frames in contemporary architecture.

Our expertise leads the industry and we regularly undertake projects which push timber beyond the boundaries of what other companies believe is possible. Our ongoing continual professional development (CPD) programmes, often delivered in conjunction with leading industry body TRADA, help to make our expertise and knowledge available to the wider architecture and construction communities.

The company has two offices, one in Wiltshire, England; the other in Angus, Scotland.

Key facts

- Founded in 1987
- Offices in England and Scotland

- Featured three times on Channel 4's Grand Designs
- Carpenter Oak & Woodland produces more bespoke timber frames than any other UK company, for both residential and commercial buildings
